"Improving the world we live in"

About Us

The Eswatini Standards Authority (ESWASA) is a government parastatal organisation within the Ministry of Commerce, Industry, and Trade (MCIT) that was established under the Standards and Quality Act (10) 2003, amended in 2023.

ESWASA, being the National Standards Body of Eswatini, is mandated by this Act to advance quality and standards in local businesses, government, and industry.

Vision

A competitive and Sustainable Trade Environment informed by effective standardization and conformity assurance in Eswatini.

Mission

We provide and promote internationally recognized quality standards and conformity assessment services to improve business performance, minimize health and safety risks and ensure environmental integrity in collaboration with regulators.

ESWASA Accreditation

Eswatini Standards Authority – Management Systems Certification Services is accredited by the Southern African Development Community Accreditation Service (SADCAS).

Scopes: Quality Management Systems to ISO/IEC 17021-1:2015 and ISO/IEC 17021-3:2017 (Certification to ISO 9001:2015), IAF Codes 3, 12, 13 and 38

ISO
ARSO
ITU
SCSTAN
IEC
ACP Affiliate Country Programme

ESWASA Services

- MANAGEMENT SYSTEMS CERTIFICATION
- PRODUCT CERTIFICATION
- SCALES & METROLOGY SERVICES
- STANDARDS DEVELOPMENT& SALES
- PRODUCT TESTING SERVICES
- STANDARDS - BASED TRAINING
- INFORMATION CENTRE / WTO ENQUIRY POINT

Certification

The core business of the ESWASA Certification department is the provision of an independent, third-party conformity assessment service for systems and products, in accordance with requirements of ISO/IEC 17021 for management systems certification and ISO/IEC 17065 for product certification.

The department mainly focuses on Management Systems Certification, Ingelo Certification, Product Certification (ESWASA Mark), Testing Services, and Scales and Metrology Services.

ESWASA clients in this division range from large globally recognised organizations with successful brands to local small businesses.

Businesses with ESWASA Certification benefit from a competitive edge, greater access to local and international trade opportunities and increased market access. They achieve organisational objectives and manage their risks.

Certification Process

ESWASA's Certifications portfolio currently includes:

✓ SZNS ISO 9001	Quality Management Systems
✓ SZNS ISO 14001	Environmental Management Systems
✓ SZNS ISO 22000	Food Safety Management Systems
✓ SZNS ISO 45001	Occupational Health& Safety Management Systems
✓ SZNS SANS 10330	Hazard Analysis and Critical Control Points

More certifications can be added to the portfolio informed by interest indicated by clients.

Scales & Metrology Services (SZNS ISO/IEC 17025)

We understand the importance of accurate and reliable measurements for your business. That is why we strive to provide the best calibration services available.

Our team of highly skilled technicians provide you with exceptional scale sales, service, repairs, installations, and calibration of all weighing equipment, weighbridges, and metrology equipment.

We utilise only the finest industry-standard equipment and procedures to ensure that all your measuring and testing instruments consistently function at their best, remaining accurate and reliable.

Services under ESWASA Metrology Laboratory:

1. Calibration of all Electronic scales
2. Calibration of all Mechanical scales
3. Repair, Service and Sales of all Scales and Weighbridges
4. Calibration and service of all Automatic and manual Gas filling Scales

Testing Services

(SZNS ISO/IEC 17025)

ESWASA is committed to ensuring the quality of products.

We are readily available to assist in the facilitating testing of commodities through the selection of accredited laboratories around Africa and the World, that will best cater for the required scopes of products of interest.

- ✓ Measure the effects of ageing on products
- ✓ Monitor potential threats from competing products
- ✓ Evaluate durability, safety, and compliance with standards
- ✓ Overcome Trade Barriers
- ✓ Provides evidence in legal proceedings

Standards

The ESWASA Standards Department has vast experience in its core function, namely, the development of Eswatini National Standards (SZNS) and maximising the benefits of international standards through adoption, which enhances the competitiveness of the Eswatini industry and advances regional and international trade.

Benefits of Standards:

- ensure that consumers have easier access to and greater choice in goods and services.
- ensure improved quality and reliability.
- ensure better operation and compatibility between products and services.
- ensure improved quality and reliability.
- ensure better operation and compatibility between products and services.

Standards are designed for voluntary use and do not impose any regulations. However, laws and regulations may reference certain standards and make compliance with them compulsory.

Standards Development Process

Standards are a collective work, whereby Committees of manufacturers, users, research organizations, government departments and consumers work together to draw up standards that evolve to meet the demands of society and technology. **Technical Collaboration** - https://tc.swasa.co.sz

- **STAGE 0** – Preliminary Stage
- **STAGE 1** – Proposal Stage
- **STAGE 2** – Preparatory Stage
- **STAGE 3** – Committee Stage
- **STAGE 4** - Enquiry Stage
- **STAGE 5** - Disposal of Comments Stage

- ✓ Integrated Management Systems
- ✓ Risk Management
- ✓ Business Continuity
- ✓ Wellness Management
- ✓ Other tailor-made Standards-based training

Information Centre

The ESWASA National Enquiry Point holds the collection of national, regional and international standards.

We welcome Students, Researchers, Industry professionals and the general public to make use of our center.

The enquiry point is a channel for mitigating problems businesses face in obtaining information on standards, technical regulations, and conformity assessment procedures for the access of their products in international markets thus eliminating Technical Barriers to Trade.
